## **REBIRTH**

---

Dear Customer,

Easter is approaching and its religious meaning recalls the theme of resurrection.

There is no better moment to taste the fullness of this word because while a part of the world is fighting an unequal struggle, another part is already imaging the **Rebirth**.

Life goes on, it doesn't stop, but renews its contents showing us that what we thought as advanced, after a few weeks, could be defined obsolete, outdated.

Today we are called to rethink our tomorrow in a conscious and responsible way, more than before

With these aims, **Paoul is investing in research and listening of the arousing needs, both human and environmental, to give concrete answers to a future that asks to be better.**

**Happy Easter**, in health and delight of the smallest things.
