## **HEART: looking at the daily life from a different point of view.**

**The new project of Paoul for 2015 is about to start.**

BACK

---

In order to describe the new Paoul project for 2015 we chose the word "ART", to describe not only a story full of heritage and its artistic side, but also a world full of colours and kindness. Fantasy, imagination, magic.

Because "art" is also the ability of looking at the daily life from a different point of view.
